Standard operating procedure

Atlas Support Services - fictional SOP S-001 - Version 0.3 - NOT APPROVED

Trigger
A new request arrives in a fictional support mailbox.

1. Receive and safeguard
Record only necessary details. Do not place sensitive attachments in unrestricted working folders.

2. Classify
Classify normal, urgent or out-of-scope against an approved definition; refer unclear urgency to the service owner.

3. Assign
Name the responsible owner and record handoff acceptance. Escalate unowned requests at the agreed checkpoint.

4. Process and record
Record decisions, missing information and current status for authorised staff.

5. Verify and close
Confirm the agreed action is complete, record outcome and retain evidence. Sample exceptions for learning.

STOP conditions
Unknown legal basis, suspicious attachment, exposed personal data, absent approval or unsafe handoff: stop and refer to the competent owner.

FICTIONAL EXAMPLE ONLY - NOT AN APPROVED POLICY, LEGAL ADVICE OR EMPLOYER DOCUMENT.
